

OnSuite provides a range of business software delivered as a web based on demand service. You have no software to install or manage – we manage the servers, the backups and upgrades for you. You use the software anywhere, anytime and anyplace. All you need is web access. OnSuite provides Collaboration, People, Management and Project services at a cost of £20 per user per month.

### **Maximise IT resources and reduce costs**

Many companies that want to maximise their IT resources are finding that using OnSuite enables IT staff and tools to be redeployed to focus on strategic projects that impact their bottom line by moving their non-strategic IT requirements to an on demand service.

### **Improve service with better return**

Like many organisations you may be struggling to justify the steep costs of buying, customising, operating and supporting business software applications. OnSuite acts as your internal IT department. No need for any more upgrade charges, licences, backups, patches or increasing maintenance charges.

### **Access key business information regardless of location**

OnSuite provides you with a suite of business applications developed with growing businesses in mind. Key areas such as Customer Relationship Management, Human Resources, Email, Instant Messaging and Project Management can be rented for a fixed fee per user per month regardless of location.

### **Manage business information efficiently**

OnSuite is a flexible, function rich, browser-based solution that efficiently manages critical business information and enables staff to make business decisions based on accurate shared information.

### **Deploy and manage with ease**

A no-touch deployment with minimal need for training reduces administration and deployment costs whilst helping staff to improve productivity and business responsiveness.

### ***Collaboration***

OnSuite provides an Intranet and Email service that encourages open communication and sharing of objectives. It allows staff, customers, business partners and suppliers to easily share information in real-time.

### ***People***

OnSuite provides improved efficiency through Self Service HR and the Customer Relationship Management functionality is designed to improve profitability, revenue, and customer satisfaction.

### ***Projects***

OnSuite provides support for staff to work effectively in Project Teams. It provides Business and Project Managers with instant access to accurate project data in order to make effective business decisions.

## **Management**

OnSuite provides support for key business management processes like timesheets, expenses, resource booking, travel booking, asset management and purchase order management enabling all of this essential data to be managed in a workflow environment.
